Nashville, Tennessee 37243

Re: *Petition of Cinergy Communications Company for Arbitration of an  
Interconnection Agreement with BellSouth Telecommunications, Inc. pursuant to  
the Telecommunications Act of 1996*  
Docket No. 01-00987

Dear Mr. Waddell:

Enclosed are the original and thirteen copies of BellSouth's non-proprietary responses to Cinergy's Data Requests. Copies of the enclosed are being provided to counsel for Cinergy.

Very truly yours,

Guy M. Hicks

GMH/jej

Enclosure

REQUEST: What is the number of residential customers served by central offices? What is the number of residential access lines served by central offices? What is the number of business access lines served by central offices?

RESPONSE: The number of residence customers served by central offices as of April 30, 2002 was approximately 1,702,139 (based on excluding additional residence line counts from total residence lines).

The number of residence access lines serviced by central offices as of April 30, 2002 was 1,929,428.

The number of business access lines served by central offices as of April 30, 2002 was 593,154 (excludes lines used by BellSouth for Internal requirements).

REQUEST: Has BellSouth or any affiliate ever, for any period of time, provided xDSL services to an end-user who concurrently subscribed to local exchange telecommunications service provided by a CLEC that provides service over BellSouth facilities by (1) resale, (2) UNE-P, or (3) unbundled loops? Please answer separately for each of the three options.

RESPONSE:

1. In the state of Tennessee, BellSouth currently provides ADSL services to NSPs to sell to end users who concurrently subscribe to local exchange telecommunications service from a CLEC that provides service over resale lines.
2. In the state of Tennessee, BellSouth has, in the past, on a very limited basis provided ADSL service to NSPs that were providing service to end users who concurrently subscribed to local exchange telecommunications service from a CLEC that provides service over UNE-P lines. This was done as a result of a systems edit error in the spring of 2001. The ADSL service was discontinued.
3. In the state of Tennessee, BellSouth has not ever provided ADSL service to NSPs that were providing service to end users who also subscribed to local exchange telecommunications service from a CLEC that provides service over unbundled loop lines.

REQUEST: Has BellSouth or any affiliate ever, for any period of time, provided wholesale xDSL services to a CLEC or ISP, or other wholesale provider that are to be combined with local exchange telecommunications service provided by a CLEC that provides service over BellSouth facilities by (1) resale, (2) UNE-P, or (3) unbundled loops? Please answer separately for each of the options.

RESPONSE:

1. In the state of Tennessee, BellSouth currently provides wholesale ADSL services to CLECs or ISPs whose ADSL service has been combined with local exchange telecommunications services provided by a CLEC that provides service over BellSouth facilities by resale.
2. In the state of Tennessee, BellSouth has in the past, on a very limited basis, provided wholesale ADSL services to a CLEC or ISP whose ADSL service had been combined with local exchange telecommunications service over UNE-P. This was done as a result of a systems edit error in the spring of 2001. The ADSL service was discontinued.
3. In the state of Tennessee, BellSouth has never provided wholesale ADSL service to a CLEC or ISP whose ADSL service was combined with local exchange telecommunications service over unbundled loop lines.

**REQUEST:** Set forth the number of competitive local exchange carriers that have collocated DSLAMs or other DSL equipment inside or adjacent to BellSouth's remote terminals in Tennessee. Identify any such carrier, the date and location of the co-location.

**RESPONSE:** BellSouth to date has not received a request from any CLEC in Tennessee to collocate DSLAMs at remote terminals. BellSouth is ready and willing to accommodate any such requests.

## CERTIFICATE OF SERVICE

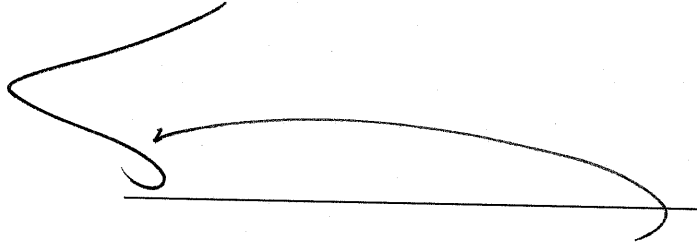

I hereby certify that on May 22, 2002, a copy of the foregoing document was served on the parties of record, via the method indicated:
